Dr. Shullz has been giving some attention to dogology recently and he has a suggestion to offer. The doctor knows a good dog on sight and he says there are dozens of them at the pound awaiting ransom or slaughter. Among them are finely bred pointers, setters, spaniels and greyhounds, whose masters evidently mat disaster, joined the Coxey army and deserted their pets to the cold mercy of the dog-catcher. Any one who wants to speculate on a dog can get any of them by paying the fees, which the dog-catcher gets for their execution and the license, making in all \$2. The doctor says that in the interest of humane principles he will pick out a dog for any one outside the city was may want one, and all. may want one, and ship it without charge for his services.

The liveliest part of the proceedings was the testimony of ex-Councilman W. L. Johnson, who is the chief instigator of the action. Mr. Johnson operated the place himself until a few years ago when he and Captain Carey, who had been warm lifends for years, fell out over some political affairs, whereupon, in the course of their quarrel, Johnson lost the place. It was always understood that Johnson desired to get even but as over two years. sired to get even but as over two years passed away without him doing anything it was supposed the whole affair had drop-ped.
